

# MAROJU NAVYASRI

+91 7386996179 ♦ marojunavyasrii@gmail.com ♦ B.Tech IT

## SUMMARY

---

B.Tech Information Technology graduate with a foundation in Python, Java, SQL, DBMS, and software development. Hands-on exposure to web development, machine learning, Artificial intelligence, cybersecurity and technical problem-solving through AI and employability internships and academic projects.

## EDUCATION

---

**Bachelor of INFORMATION TECHNOLOGY** , Maturi Venkata Subba Rao Engineering College. 2022 - 2026

## SKILLS

---

|                      |                                                                                      |
|----------------------|--------------------------------------------------------------------------------------|
| <b>Programming</b>   | Python, Java, SQL                                                                    |
| <b>AI/ML</b>         | Machine Learning, Deep Learning, DNN, LSTM, SHAP, LIME                               |
| <b>Web</b>           | HTML,CSS                                                                             |
| <b>Database</b>      | MYSQL, DBMS                                                                          |
| <b>Core Concepts</b> | Object-Oriented Programming, Problem Solving, Software Development Life Cycle (SDLC) |

## EXPERIENCE

---

**AI and Employability Skills Intern** Nov 2025 - Feb 2026  
FUEL

- Completed 4-month intensive internship on Advanced Artificial Intelligence with Employability Skills under FUEL, mentored by industry leaders from University of Cambridge (JBS)
  - Gained hands-on exposure to AI concepts, problem-solving methodologies, and professional communication essential for industry readiness
  - Developed technical and soft skills aligned with current job market demands through structured training and mentorship
- SOFT SKILLS**

## PROJECTS

---

### INTERPRETABLE DEEP NEURAL NETWORKS USING SHAP AND LIME FOR DECISION MAKING IN SMART HOME AUTOMATION

- Developed an interpretable deep neural network (DNN) model using SHAP and LIME to enhance transparency in AI driven smart home automation system.
- Trained a DNN model to recognize patterns in IoT sensors data from smart home environments and make automation decisions, with a focus on explainability.

## CERTIFICATIONS

---

**AICTE ARTIFICIAL INTELLIGENCE** Oct 2024 - Nov 2024

- Completed Slashmark AI internship, gaining hands-on experience in AI and machine learning.

**AICTE CYBERSECURITY** Jun 2025 - Aug 2025

- Gained hands-on experience in cybersecurity practices and threat mitigation strategies through AICTE internship.

## ADDITIONAL SKILLS

---

- Willingness to Learn
- Problem Solving
